GANESH SAI

Power Platform | SPFx | Microsoft 365

(314)-596-2461 | Ganeshp14se@gmail.com | Austin | Texas

PROFESSIONAL SUMMARY

Power Platform and SharePoint developer with 3+ years of application development and enterprise Microsoft 365 experience, including Power Apps, Power Automate cloud flows, REST API integration, PowerShell automation, and application testing. Developed approval, reporting, and permissions workflows while supporting security, troubleshooting, and user acceptance testing across a 107-site IT portfolio.

TECHNICAL SKILLS:

Power Platform: Power Apps (Canvas, Model-Driven), Power Automate, cloud flows, approvals, SharePoint connectors, Power BI

Development & Integration: SharePoint Online, REST APIs, JSON, JavaScript, TypeScript, PowerShell, PnP PowerShell, SPFx

Security & Data: SharePoint permissions, access governance, metadata validation, SQL fundamentals

Delivery & Tools: SDLC, requirements analysis, backlog tracking, UAT, incident resolution, Azure DevOps, ShareGate

PROFESSIONAL EXPERIENCE

State of Washington - Department of Labor & Industries | Remote

Power Platform Developer | Jan 2025 - Present

- Developed a Power Apps request solution integrated with a Power Automate approval flow, combining request submission, reviewer decisions, and status updates into one tracked workflow.
- Built a Power Automate cloud flow to retrieve SharePoint Online item counts, providing validation data for site owners during a two-stage release process.
- Developed a bulk permissions workflow using Power Automate and PowerShell to support access cleanup across 40 SharePoint sites, reducing repeated administrative work.
- Supported application testing, troubleshooting, and owner UAT across a 107-site IT portfolio, validating permissions, metadata, and content during initial and final releases.
- Investigated a 138-item SharePoint library with only 105 destination items, identifying 33 missing items for remediation before owner signoff.
- Worked with business owners and governance teams to define requirements for 57 Director's Office sites, identifying 4 deletion candidates and separating retention and access needs into delivery tasks.
- Used SharePoint REST APIs and PowerShell scripts to support access validation and release communication during two-stage deployments.

OpenText | Hyderabad, India

SharePoint Application Developer| June 2021 - Jul 2023

- Developed a SharePoint permissions web part that showed managers site-collection access in one view, simplifying user-permission reviews.
- Built and maintained a SharePoint 2010 business application in a midsize server farm, supporting application configuration and issue resolution.

PROJECTS

Process Improvement Intake and Approvals | Portfolio prototype

- Built Power Automate approval and escalation flows for SharePoint improvement requests, connecting Power Apps intake submissions with reviewer actions.
- Defined Power BI backlog and cycle-time KPIs; documented UAT scenarios and release checks for the intake and approval prototype.

EDUCATION

Master's in Science and Engineering | Bachelor's Degree in Computer Science
